

MSc Econometrics and Mathematical Economics (EME)

Kick-off session for cohort entering in Fall 2026

Christoph Walsh

Department of Econometrics and OR, Tilburg University

August 24 2026

Outline

Overview of the Program

Core Courses and Electives

Job Profiles and Example Courses

Getting More Involved

After Graduation

Contact Information

Econometrics and Mathematical Economics

- ▶ Goal of the program: enable you to do meaningful work in your future job.
- ▶ Aim is to combine knowledge of econometrics with understanding of economics and/or business problems.

Component	Cluster	ECTS
Core courses	A	24
Electives	B	18
Master Thesis	–	18
Total		60

1 course/elective = 6 ECTS

Cluster A courses (Core Courses): 24 ECTS

You must take 4 of the following:

Fall semester

- ▶ Microeconometrics (Units 1-2)
- ▶ Panel Data Analysis of Microeconomic Decisions (Units 1-2)
- ▶ Empirical Finance (Unit 1)
- ▶ Market Design (Unit 2)

Spring semester

- ▶ Data Science Methods (Unit 3)
- ▶ Dynamic Economic Models (Units 3-4)
- ▶ Time Series and their Applications (Unit 4)

Cluster B courses (Electives): 18 ECTS

- ▶ Many additional courses to choose from (and this list is not exhaustive):
 - ▶ Machine Learning Analytics
 - ▶ Individual Decision Making
 - ▶ Macroeconomic Dynamics: Consumption, Investment and Growth
 - ▶ Financial Markets and Institutions
 - ▶ Valuation Risk and Management
 - ▶ Decision Making under Uncertainty
 - ▶ Economics and Finance of Pensions
 - ▶ Asset Liability Management
 - ▶ Professional Business Analytics Skills
 - ▶ Games and Cooperative Behavior
 - ▶ Decentralized Finance and Blockchains
 - ▶ Dynamic Real Investment
- ▶ To help you make your choice, we present job profiles with corresponding core courses and electives.
- ▶ You can ask for additional courses in the study plan.

Master Thesis (18 ECTS)

- ▶ You can choose your own topic, and choose your own start date.
- ▶ You can write a thesis with a company in an internship, or you can write an internal thesis.
- ▶ Thesis internship topics:
 - ▶ Canvas page for thesis BAOR/QFAS/EME
 - ▶ Career Services
 - ▶ Asset Econometrics
 - ▶ Own networks.
- ▶ Internal thesis topics:
 - ▶ Canvas page for thesis BAOR/QFAS/EME
 - ▶ Professors
 - ▶ Own ideas.
- ▶ Topic must relate to EME core courses (i.e. Economics, Econometrics, Finance).

Master thesis (18 ECTS)

- ▶ Write an email with a brief proposal to the thesis coordinator.
 - ▶ Current thesis coordinator: Denis Kojevnikov.
- ▶ Thesis coordinator approves the topic and assigns a supervisor.
- ▶ Thesis has to be completed in 6 “thesis months”.
- ▶ You can start as soon as you have 30 ECTS.
- ▶ Start looking for a topic or internship early.

Microeconometrics (Fall)

- ▶ Wide range of methods for analysis of individual-level cross-sectional data:
 - ▶ Estimation of causal effects.
 - ▶ Structural estimation.
 - ▶ Semi- and nonparametric methods.
 - ▶ Models for binary, ordered, and multinomial choice.
- ▶ Good preparation for working with “big data”.
- ▶ Complementary to the Panel Data Analysis course, but can be taken independently.

Panel Data Analysis of Microeconomic Decisions (Fall)

- ▶ Empirical models to analyze panel data on decisions of economic agents: individuals, households, and firms.
- ▶ Both static and dynamic, and both linear and non-linear models.
- ▶ Applications in:
 - ▶ Consumption, savings and investment
 - ▶ Labor economics
 - ▶ Retirement and pensions
 - ▶ Health economics
 - ▶ Development economics
 - ▶ Environmental economics
- ▶ Complementary to Microeconometrics course, but can also be taken independently.

Empirical Finance (Fall)

- ▶ Empirical applications in finance:
 - ▶ The Efficient Market Hypothesis.
 - ▶ Predictability of asset returns.
 - ▶ Climate finance.
 - ▶ The finance of pensions and aging.
 - ▶ Behavioral finance.
- ▶ Econometric techniques:
 - ▶ Linear regression
 - ▶ Generalized method of moments
 - ▶ Maximum Likelihood

Market Design (Fall)

- ▶ Theory and application of market design without money (matching) and with money (auctions).
- ▶ Matching examples include kidney exchange and school admissions.
- ▶ Auctions examples include broadband spectrum auctions and internet advertising and keyword auctions.

Data Science Methods (Spring)

- ▶ Focus on modern statistical and machine learning techniques to make business decisions that involve big data.
- ▶ Applications in finance, marketing and economics.
- ▶ Cleaning, summarizing and visualizing big data.
- ▶ Model selection for prediction: LASSO, ridge, factor models, trees, random forests.
- ▶ Model selection for classification: clustering, trees, random forests, support vector machines.

Dynamic Economic Models (Spring)

- ▶ Emphasis on dynamic decision models under uncertainty.
- ▶ Markov decision problems and Markov games in discrete time, with or without strategic interaction between players.
- ▶ Examples from life-cycle analysis, demand estimation, learning, competition, and antitrust policies.
- ▶ Great combination of economic theory, econometric methods, and computation.

Time Series and their Applications (Spring)

- ▶ Estimation, testing, and forecasting with time series models.
- ▶ Examples: cash flows, profits, macro variables like unemployment, GDP, and interest rates.
- ▶ Focus on time series econometric models and techniques: ARMA, VAR, ARCH, SV, dynamic regression, Kalman filtering.
- ▶ Used by central banks, pension funds, insurers, and policy institutions like CPB.

Possible Elective Courses

You choose 3×6 ECTS courses among:

- ▶ Remaining 3 core courses.
- ▶ Courses from MSc QFAS and MSc BAOR.
- ▶ Courses in Cooperative Game Theory and Dynamic Real Investment.
- ▶ Courses from Research Master Economics (subject to approval by CentER).
- ▶ Courses from MSc Economics (maximum one course).
- ▶ Data science courses in MSc Economics, MSc Finance, and MSc BAOR.

Software workshops and DataCamp

Software Workshop

- ▶ The program offers video lectures with introductions to Matlab and Stata.
- ▶ Canvas page for software courses.
- ▶ There can be Q&A sessions on the video lectures.

DataCamp

- ▶ This online learning environment features courses in R, Python and SQL.
- ▶ Every student can learn to program in a user-friendly way, free of charge, and without any prior knowledge.
- ▶ You can start at any moment and take courses at your own pace.

Job profiles and example courses

- ▶ The MSc EME program can prepare you for a number of different job profiles.
- ▶ We present job profiles with corresponding core courses and electives for:
 - ▶ Economic Policy Analyst.
 - ▶ Quantitative Financial Analyst.
 - ▶ Data Scientist.

Note on Acronyms:

- ▶ RME: Research Master Economics (subject to approval by CentER).
- ▶ RMB: Research Master Business (subject to approval by CentER).
- ▶ MSE: MSc Economics (at most one elective).

Job Profile: Economic Policy Analyst

Typical first jobs:

Economist, analyst, policy advisor, or researcher with consultancy companies, banks, research organizations, the government, and the public sector.

Related programs:

Taking courses in this sequence helps facilitate a later switch to the Research Master Economics.

Job Profile: Economic Policy Analyst

Fall semester

- ▶ Market Design
- ▶ Panel Data Analysis of Microeconomic Decisions
- ▶ Microeconometrics
- ▶ Macroeconomics Dynamics: Consumption, Investment, and Growth (RME)
- ▶ Individual Decision Making (Microeconomics) (RME)
- ▶ Financial Markets and Institutions (MSE)
- ▶ Growth and Regional Development (MSE)
- ▶ Econ. and Psych. of Risk and Time (MSE)
- ▶ Health Economics (MSE)

Spring semester

- ▶ Time Series Models and their Applications
- ▶ Data Science Methods
- ▶ Dynamic Economic Models
- ▶ Games and Cooperative Behavior
- ▶ Dynamic Real Investment
- ▶ Core Courses in research master economics (RME)
- ▶ Environmental and Resource Economics (MSE)
- ▶ Labor Economics (MSE)
- ▶ Data Science for Economics (MSE)

Job Profile: Quantitative Financial Analyst

Typical first jobs:

Quantitative financial analyst, risk manager.

Related programs:

Stronger emphasis on econometrics than the QFAS Master.

Job Profile: Quantitative Financial Analyst

Fall semester

- ▶ Empirical Finance (Unit 1)
- ▶ Microeconometrics
- ▶ Panel Data Analysis of Microeconomic Decisions
- ▶ Valuation and Risk Management
- ▶ Financial Markets and Institutions (MSE)

Spring semester

- ▶ Time Series and their Applications (Unit 3)
- ▶ Data Science Methods (Unit 3)
- ▶ Asset Liability Management (Unit 3)
- ▶ Issues in Finance and Insurance
- ▶ Risk and Regulation
- ▶ Dynamic Real Investment (Unit 4)
- ▶ Professional Business Analytics Skills

Job Profile: Data Scientist

Typical first jobs:

Analyst or researcher in economics and business at management, service and consultancy companies, non-profit organizations, and application providers.

Related programs:

More focused on economics and econometrics than the BAOR Master.

Job Profile: Data Scientist

Fall semester

- ▶ Microeconometrics
- ▶ Panel Data Analysis of Microeconomic Decisions
- ▶ Empirical Finance (Unit 1)
- ▶ Machine Learning Analytics
- ▶ Decision Making under Uncertainty

Spring semester

- ▶ Data Science Methods (Unit 3)
- ▶ Time Series and their Applications
- ▶ Professional Business Analytics Skills
- ▶ Data Science for Economics (MSE)

Getting More Involved

- ▶ Please consider joining:
 - ▶ Education committee
 - ▶ Sounding board

Email me or Sigrid if you would like to join

- ▶ Please fill out teaching evaluations (with comments).
- ▶ Come to lectures and tutorials.

After Graduation

- ▶ Think early about the next steps.
- ▶ Attend career events.
- ▶ See list with recommended career events on Canvas.
- ▶ National Econometricians' Day: sign up early.
- ▶ Consider joining Asset Econometrics.
- ▶ Check Career Services.

Education Coordinator

First point of contact for:

- ▶ Study progress & study related issues
- ▶ Study advice & planning
- ▶ Special personal circumstances
- ▶ Extracurricular activities

Sigrid de Bonth
